Months Supply of Inventory by Price Range

Explanation of Metrics and Notes on Data Sources and Methodology

Closed Sales – A count of the actual sales that have closed; Median Sales Price – The price at which half the homes sold for more, and half sold for less; Days on Market – Average, cumulative number of days between when a property is listed and when it goes pending; Pending Sales – A count of the homes that were under contract, and should close within 30-90 days; Inventory – A count of the homes for sale on the 11th day of a given month following the one reported; Months Supply of Inventory – Takes the number of homes for sale divided by the average number of closed sales by month for the preceding twelve months. A balanced market—not favoring buyers or sellers—is typically between 4-6 months of supply. *For areas with fewer total transactions, the median sales price reported is based on a rolling 12-month median. This smooths out potential month-over-month swings due to seasonality, very high or low sales prices that may occur one month but are not common, or other activity that may not be representative of the overall price trends for the area or market segment.

The information in this report is based primarily on the public statistics provided by the Intermountain MLS (IMLS), a subsidiary of Boise Regional REALTORS® (BRR), available here: intermountainmls.com/Statistics/Static.aspx. These statistics are based upon information secured by the agent from the owner or their representative.
